

Management Policy - Norway

Corvus Energy is committed to providing high quality energy storage solutions that meet or exceed our customer's expectations in a safe, environmentally sustainable and socially responsible manner.

The Scope of the Corvus Energy Quality and Environmental Management System in Norway is the sales, design, project management, manufacturing and service of lithium-ion batteries and control systems.

We will achieve this by:

- Implementing a management system that integrates Health and Safety, Environmental Accountability, Quality and Social Responsibility
- Designing solutions that meet or exceed our customers' expectations for Safety, environment, quality, performance and reliability
- Helping our customers to meet their environmental goals
- Protecting the health and safety of our employees and partners
- Minimizing the environmental and social impact of our manufacturing processes and business activities
- Continually improving our products and processes with respect to these objectives
- Adhere to the corporate values of Corvus Energy
