Environment Policy

Corvus Energy is committed to providing sustainable and environmentally friendly products and services to achieve our mission of powering a clean future.

The scope of the Corvus Energy Management System is design, development, manufacturing and servicing of lithium-ion batteries, control systems and fuel cell systems.

We commit to this by:

- Ensuring that the environmental aspects is considered in all decisions and actions we take
- Being passionate about minimizing waste throughout in everything we do
- Innovative product designs that provide maximum environmental benefit to our customers and to the planet towards end of life
- Acting with integrity to ensure compliance with all governmental and international agencies, laws, regulations and industry best practices

Through our environmental focus and work – we aim to be team players with our planet.

Fredrik Witte, CEO
